Table.1 World population, urban population and estimated slum population

	World population	Urban population		Slum population	
	millions	millions	% of world	thousands	% of urban
			population		population
1950	2,530	750	29.4	NA	NA
2001	6,134	2,923	47.7	923,986	31.6
2014	7,243	3,880	53.5	(1,226,080)	(31.6)
2050	9,310	6,250	67.2	(1,975,000)	(31.6)

Figure on slum population is available only for 2001. Applying this figure, slum population is estimated for 2014 and 2050.

Source: UN Habitat Annual Report 2014

Left: Rapid growth has taken place since 18th century.

Right: Nearly four times growth during a century (1950-2050). July 11 is World Population Day commemorating the day when population exceeded 5 billion in 1987.

Urban population was less than 1/3 (30%) in 1950 and exceeded rural population in 2007. It is 54% in 2014 and will be more than 2/3 (66%) by 2050.

Source: World Urbanization Prospects The 2011 Revision, UN Department of Economic and Social Affairs

Figure.2 Urban and rural population

Increase in world population is substantially due to increase in urban population in less developed regions

Source: World Urbanization Prospects The 2011 Revision, UN Department of Economic and Social Affairs

Figure.3 Urban and rural population in less and more developed regions

Urbanization is progressing in all regions. Majority will live in urban areas by 2050.
