Infrastructure Development Institute - Japan**

**GUIDELINES
FOR
DEVELOPMENT OF WARNING AND EVACUATION SYSTEM
AGAINST SEDIMENT DISASTERS IN DEVELOPING COUNTRIES**

CONTENTS

General

CHAPTER 1	BACKGROUND AND PURPOSE OF THE GUIDELINES	1
1.1	Background of the Guidelines	1
1.2	Purpose of the Guidelines	3
CHAPTER 2	APPLICATION OF THE GUIDELINES	3
2.1	Potential Users of the Guidelines	3
2.2	Scope of Application	3
CHAPTER 3	ORGANIZATION AND FEATURES OF THE GUIDELINES	4
3.1	Organization of the Guidelines	4
3.2	Features of the Guidelines	6

Basis of Sediment Disaster

CHAPTER 1	PRINCIPLES OF OCCURRENCE OF SEDIMENT DISASTERS	1
1.1	Modes of Sediment Disaster Occurrence	1
1.1.1	Phenomena to cause sediment disasters	1
1.1.2	Types of debris flows	3
1.1.3	Slope failures and landslides	4
1.2	Mechanical Factors and Incitant Factors of Sediment Disasters	4
1.3	Mechanism of Occurrence of Sediment Disasters	6
1.3.1	Mechanism of occurrence of slope failures	6
1.3.2	Mechanism of occurrence of debris flows	7
1.4	Prediction of Sediment Disaster Occurrence by Rainfall	8
CHAPTER 2	ACTUAL STATE OF SEDIMENT DISASTERS AND PREVENTIVE MEASURES	9
2.1	Actual Damage due to Sediment Disasters	9
2.1.1	Examples of debris flow disasters	9
2.1.2	Examples of slope failure disasters	12
2.2	Present State of Structural Measures against Sediment Disasters	14
2.2.1	Structural measures against debris flows	14
2.2.2	Structural measures against slope failures	15
2.3	Need for the Development of Warning and Evacuation System	16
CHAPTER 3	PREDICTION METHOD OF OCCURRENCE OF SEDIMENT DISASTERS	18
3.1	Outline of Various Prediction Methods	18
3.2	Prediction Method Using Working Rainfall	18
CHAPTER 4	ACTUAL STATE OF WARNING AND EVACUATION SYSTEM AGAINST SEDIMENT DISASTERS	22
4.1	Development of Warning and Evacuation System against Sediment Disasters in Japan (A Case at Mt. Unzen-Fugen)	22
4.2	Development of Warning and Evacuation System against Sediment Disasters in Developing Countries	23
4.2.1	Warning system against sediment disasters established at the	

	Merapi volcano (Indonesia)	23
4.2.2	Warning system against sediment disasters established in the upstream of the Chang Jiang River (China)	26
4.2.3	Disaster prevention activities in the Provinces of Central Java and Jogjakarta (Indonesia)	27
4.2.4	Disaster prevention meeting and evacuation training in the Dahachowk area (Nepal).....	27
4.2.5	Preparation of hazard map in the Bhagra area with public involvement (Nepal)	28

Planning of Warning and Evacuation System

CHAPTER 1	IDENTIFICATION OF SEDIMENT DISASTER HAZARD AREAS.....	1
1.1	Debris Flow Hazard Areas.....	1
1.1.1.	Selection of survey areas	1
1.1.2	Survey for the determination of debris flow hazard areas	2
1.1.3	Determination of debris flow hazard areas.....	4
1.1.4	Social survey in debris flow hazard areas	5
1.2	Slope Failure Hazard Areas	7
1.2.1.	Selection of survey areas	7
1.2.2	Survey for the determination of slope failure hazard areas	8
1.2.3	Determination of slope failure hazard areas.....	9
1.2.4	Social survey in slope failure hazard areas	10
1.3	Selection of Areas for the Development of Warning and Evacuation System	10
1.3.1	Debris flow hazard areas.....	11
1.3.2	Slope failure hazard areas	11
CHAPTER 2	MONITORING AND FORECAST OF SEDIMENT DISASTERS	12
2.1	Monitoring of a Debris Flow	12
2.1.1	Establishment of the debris flow visual observation system	12
2.1.2	Establishment of a debris flow detection/monitoring system	13
2.2	Collection and Arrangement of Rainfall Data.....	13
2.2.1	Determination of representative rainfall gauging stations.....	13
2.2.2	Collection and Arrangement of Rainfall Data.....	13
2.3	Policy for the Setting of Standard Rainfalls for Warning and Evacuation against Sediment Disasters	14
2.3.1	Case when hourly rainfall data are accumulated	14
2.3.2	Non-case when hourly rainfall data are accumulated	15
2.4	Setting of Standard Rainfalls for Warning and Evacuation by the Guideline Method.....	17
2.4.1	Outline of the Guideline Method	17
2.4.2	Analysis of debris flow causing rainfall and non-causing rainfall.....	18
2.4.3	Setting of standard rainfalls by Method A (Guideline Method) ...	23
2.4.4	Setting of standard rainfall by Method B (Guideline Method).....	27
2.4.5	Features of Guideline Method and care for use.....	31
2.5	Method Proposed by the Committee for Studying Comprehensive Sediment Control Measures (Committee Method)	32
2.5.1	Outline of the Committee Method	32
2.5.2	Collection and recording of the data on causing/non-causing	

	rainfalls of sediment disasters	34
2.5.3.	Setting of standard rainfalls	35
2.5.4.	Features of Committee Method and care for use.....	38
2.6	Setting of Standard Rainfalls in Case When Hourly Rainfall Data are not Accumulated	39
2.6.1	Setting of standard rainfalls using the total rainfall.....	39
2.6.2	Setting of standard rainfalls when rainfall data are not available at all.....	40
2.6.3	Tentative measures before a rainfall gauging station is installed..	42
2.7	Preparation and Utilization of Country Watching Map (CWM)	43
2.7.1	Outline of country watching map (CWM)	43
2.7.2	Preparation of Country Watching Map (CWM)	43
2.7.3	Effect of Country Watching Map (CWM).....	44
CHAPTER 3	DELIVERY AND TRANSMISSION OF SEDIMENT DISASTER INFORMATION	46
3.1	Structure of the Sediment Disaster Warning System	46
3.2	Roles of Organizations Responsible for Sediment Disasters	47
3.2.1	Organizational structure on disaster prevention	47
3.2.2	Roles of organizations responsible for the delivery of warning information on sediment disasters.....	48
3.2.3	Roles of organizations responsible for emergency measures	48
3.3	Operation of Warning and Evacuation System against Sediment Disasters	49
3.4	Warning Information on Sediment Disasters	50
3.4.1	Objective of warning information on sediment disasters	50
3.4.2	Contents of warning information on sediment disasters.....	50
3.4.3	Examples of warning information on sediment disasters	51
3.5	Communication Tools for Information Transmission	52
CHAPTER 4	EVACUATION PLAN	53
4.1	Tools for Evacuation of the Local People.....	53
4.1.1	Disaster prevention maps.....	53
4.1.2	Disaster prevention manuals	54
4.1.3	Disaster prevention posters	57
4.2	Development of Evacuation Facilities	57
4.3	Education and Enlightenment on Disaster Prevention	58
4.3.1	Education and enlightenment for the local people	58
4.3.2	Human resources development, organizational strengthening, and public consultation	58
4.4	Disaster Prevention and Evacuation Activities Taken by the Local People.....	59
